McWeadon
Enabling Learning Without Boundaries

ET511: Migrating Already-Existing Material To E-Learning Format

Seeking self-motivated continuing education learners who are interested in in-depth discussion and practical application!

McWeadon is currently offering *ET511: Migrating Already-Existing Material To E-Learning Format,* a 4-week online course with special discounted rate of **$99.** McWeadon instructor Caroline Silver will be your personal coach and guide as you develop your skills in the course. She has taught similar courses at businesses and national organizations in the United States.

Learn in a highly facilitated manner at your convenience. Our instructors are personally accountable to ensuring the utmost quality and interaction, and the credibility of this valuable learning environment.

WHAT YOU'LL LEARN

This course will focus on taking already-existing lessons and material and migrating them to an e-learning format. Concentration will be on analyzing the current materials, analyzing the e-learning environment and deciding what changes need to be made. Discussion will center on how the e-learning environment differs from the traditional environment and how accommodations can be made to suit the e-learning environment. Course participants will:

- correctly analyze the differences between a traditional learning environment and an e-learning environment and,
- successfully migrate an already-existing lesson to an e-learning format

MEET THE INSTRUCTOR

Caroline Silver

Caroline Silver earned her Bachelor's of Science from the University of Phoenix in Information Technology and her Master's of Science in Education from Duquesne University in Instructional Technology. She has worked in the K-12 as well as corporate environment, creating training materials for all subjects and levels of students. Ms. Silver is at the forefront of creating innovative e-learning experiences for high school students who are not sufficiently challenged by existing opportunities. She has depth of knowledge and experience in an extremely wide variety of technologies including video editing, animation, web technologies and distance learning development systems. The subjects she has creating training for include technical training; school subjects such as math, English language and science; and religious theory and practice. Caroline has created training and educational materials on a wide variety of platforms, from print to self-paced distance learning, from video and audio to Instructor-Led systems.
