Learn in a highly facilitated environment at your convenience. Our instructors are personally accountable to ensure the utmost quality and interaction and the effectiveness of this valuable learning environment.

WHAT YOU'LL LEARN

PM501: Introduction to Project Management

Project management is the discipline of planning, organizing and managing resources to successfully complete a project on time, on schedule, and to customers' specified requirements. Industries around the world as diverse as IT, construction, entertainment, training & education, and government seek formally trained project managers. This course introduces participants to the principles, processes, tools, and terminology of project management through the use of online text, discussions, animations and practice activities. Emphasis will be given to avoiding project pitfalls and ensuring project success through scope definition, risk management, and change control processes.
